

INLINE fitting with paddle-wheel for flow measurement

Type S030 can be combined with...

Type 8030
Flow sensor

Type 8032
On/Off flow sensor/switch

Type SE30 Ex
Flow sensor
ATEX version

Type 8035
Flow transmitter

- Pipe diameters 1/4" (DN 6) to 2 1/2" (DN 65)
- Closed pipe system, i.e. sensor inside fitting
- Quarter-turn technology
- Electronics available for
 - Indication, Monitoring, Transmitting
 - On/Off control, Batch control

The fitting S030 has a built-in paddle-wheel to measure the flowrate. When liquid flows through the pipe, the paddle-wheel is set in rotation producing pulses which frequency is proportional to the flowrate. This leads to a very leak-proof construction, called the "INLINE Quarter-turn" technology. The paddle-wheel rotation is detected contactless through the fitting wall. The sensor unit can be snapped-on or removed without opening the pipe or interrupting the process.

Installation

Minimum straight upstream and downstream distances must be observed. According to the pipe's design, necessary distances can be bigger or use a flow conditioner to obtain the best accuracy. For more information, please refer to EN ISO 5167-1.

EN ISO 5167-1 prescribes the straight inlet and outlet distances that must be complied with when installing fittings in pipe lines in order to achieve calm flow conditions. The most important layouts that could lead to turbulence in the flow are shown below, together with the associated prescribed minimum inlet and outlet distances. These ensure calm, problem-free measurement conditions at the measurement point.

Installation

The flow rate sensor, transmitter can be installed into either horizontal or vertical pipes.

Pressure and temperature ratings must be respected according to the selected fitting material.

The suitable pipe size is selected using the diagram Flow / Velocity / DN.

Conception

Selection fitting / pipe size

Example:

- Specification of nominal flow: 50 gpm
- Ideal flow velocity: 6 - 8 f/s
- For these specifications, the diagram indicates a pipe size of 1 1/2" (DN40) [or 2" (DN50) for (*) mentioned fittings]
